Rareș Ciubotaru

Senior React & Node.js Developer

I work as a Typescript/Javascript developer, with 5+ years of professional experience and a notable track record within the information technology and services sector. Experienced in full-stack development with specialized expertise in client-side technologies.

I use my expertise to determine and carry out my client's requirements for their software solutions.

Work Experience

Mobizcorp GbmH
Apr 2024 - Mar 2025

Senior React & Node.js Developer

Brooks Running, the client, an American retailer of sports equipment, aimed to improve the experience of its customers in all markets by developing a custom portal for managing content.

- Implemented multi-tenant authentication using AWS Cognito and NextAuth.js, adhering to OpenID Connect best practices.
- Enhanced media content load times by leveraging Akamai CDN and AWS S3 storage.
- Designed and implemented a market-agnostic internationalization (i18n) system to support multiple languages and regions.

Skills: Typescript, React, Next.js,, Node.js, Express, PSQL, AWS, Akamai, Docker, K8

Jellysmack
Sep 2023 - Mar 2024

React & Node.js Developer

The client provides digital solutions for content creators and videographers in the fast-evolving social media landscape. My contribution involves the development of JellyX, an AI-powered chat tool designed to enhance the creative process for content creators.

- Cost reduction achieved by integrating an open-source link shortener for SMS notifications into the existing microservices architecture using AWS SQS and Lambda.
- Enhanced app performance by optimizing React Query data fetching strategies, eliminating redundant API calls, and efficiently managing nested data structures.
- Engineered and implemented the "Share Conversation" feature, leveraging Next.js for client-side rendering and Node.js for server-side API development.
- Reduced codebase by 30% through refactoring redundant UI components with shadcn/ui library, improving accessibility.

Skills: Typescript, React, ReactQuery, Next.js, Tailwind, Node.js, Express, Prisma, AWS

Softbinator Technologies
May 2022 - Aug 2023

React & Node.js Developer

EntroCim, a provider of IoT-based enterprise management solutions, specializes in custom content management systems. The company sought to modernize its EntroCim Dashboard and DC products by introducing new features and updating existing functionality to align with current industry standards and technological advancements.

- Improved the performance of Entrocim Dashboards by switching from Context to Redux Toolkit and compressing large media files.
- Reduced time-to-first-byte from 2 seconds to under 1 second by refactoring chart components from class-based to functional React architecture.

Skills: Typescript, React, ReactQuery, Next.js, Tailwind, Node.js, Express, Prisma, PSQL

IBM

React Developer

The client, **local.ch**, aimed to extend its operations and services by developing a new platform embracing new technologies to react to the changing market for hospitality services.

- Implemented server-side rendering using Next.js, significantly improving page load times and SEO performance.
- Implemented an interactive, responsive map interface using Google Maps API, integrating with existing GraphQL backend through custom query hooks.
- Enhanced app accessibility by 40% through close collaboration with the UX team.
- Accelerated development cycles by implementing Storybook for component-driven development, enhancing reusability, and ensuring comprehensive unit and E2E test coverage.

Skills: React, Typescript, Next.js, Storybook GraphQL, Recoil, Redux, Jest & Cypress

BCR - Erste Group

Jul 2019 - Oct 2019

Intern Digital Banking Solutions

During my internship at one of the biggest banks in Romania, I was part of the Business Intelligence & Software Department.
Junior Business Analyst:

- Tracking, analyzing & forecasting the progress of different campaigns using
- Google Analytics data with R scripts. Statistical analysis based on data from marketing campaigns. Data management for different marketing campaigns.

Junior Web Developer:
- Update and refactor web components.

Skills: React, Javascript, CSS, R, Google Analytics, Excel
